* All core courses include discipline knowledge

Core Curriculum: Committee Alignment of the Central Six Fall 2010*

Committee Comments and Recommendations:

- The Central Six tenets were applied as each College or area interpreted them. For instance, some courses that include service learning and civic engagement as a tenet may more heavily incorporate civic engagement than service learning. The committee does not perceive this as an issue, but accepts that the tenets are purposefully written in a broad sense in order to be applied in various courses across diverse fields.
- The committee felt that all Central Six tenets were properly represented throughout the core course offerings. While service learning was included the least number of times, it was still represented throughout the core. Furthermore, the committee believes that ample service learning opportunities exist for UCO students in a number of venues on campus.
- The committee recommends that future core course proposals include which tenets the courses meet and that a syllabus is included for all new core course proposals.
