UCO IR Enrollment Reports Explanation

Selection

This page allows you to select the term and dates for the enrollment reports.

- Report Term Selection will allow you to select one term; only terms with data are available for selection.
- Column A Date is usually used for the most current date available.
- Column B Date is usually used for the same point in time last year.
- Column C Date is usually used for the final preliminary enrollment figures for last year. This date is defined by the term selected and is not available for selection.

UCO Overview

This page gives you an overview of UCO at a certain point in the year. The dates shown at the top consist of the following:

- The first date listed reflects a given point in time for the current semester.
- The second date listed reflects the same point in time for the previous year.
- The third date listed reflects the final enrollment figures for the previous year.

The subheadings on the left consist of the following:

- **Headcount Enrollment**, is the number of students enrolled at UCO at that specific point in the semester. This section is broken down by class.*
- **FTE Enrollment** stands for full-time equivalency, and it is equated by dividing the total number of credit hours by 15 for undergraduate students and 12 for graduate students (for the Summer term, these figures are divided by half). This section is also broken down by class and appears in the department in which the student is majoring.
- **Credit Hours** is the number of hours of credit in which the students are enrolled. It is not major-based, but rather, assigns hours to the department that produced the course. The credit hours in this section are broken down by the undergraduate and graduate students that pay in-state (resident) versus out-of-state (non-resident) tuition.
- **First Time Freshman** describes those students who are enrolling in a college or university for the first time. These numbers depict both full-time and part-time students and are broken down by first time in-state (resident) students and first time out-of-state (non-resident) students.
- **First Time Transfers/Graduates**: First time transfers describe students who are transferring hours and enrolling at UCO for the first time. First time graduates describe those students who are enrolling in graduate school for the first time.*

*Post-Baccalaureate students are undergraduate students that have obtained a Bachelors degree but are continuing their studies.

Credit Hours
This page gives you the total number of credit hours a college or department is producing at a given point in time. The application assigns the hours to the department that is associated with the CRN for a given course, not based on the major of a student taking the course. The dates shown at the top reflect the same periods of time as in the overview.

First Times

This page provides the number of first-time students enrolled at a certain point in the semester. The information can be displayed by college or for a specific department using the radio buttons at the top of the page. The data below is broken down initially by first-time type and then within those categories by program. The first-time definitions and time periods displayed are the same as those listed in the overview.

Declared Majors

This page provides the number of students declaring each major at a specific point in the semester. The information can be displayed by college or for a specific department using the radio buttons at the top of the page. The data below is broken down initially by program and then within those categories by student classification. It is important to note that some programs are strictly undergraduate or graduate programs, which is denoted by the degree displayed with the program as well as values of only 0 for either all undergraduate or all graduate classifications.*

*Post-Baccalaureate students are undergraduate students that have obtained a Bachelors degree but are continuing their studies.
