Tips for driving in snow and ice

1. Decrease your speed and leave yourself plenty of room to stop. You should allow at least three times more space than usual between you and the car in front of you.
2. Brake gently to avoid skidding. If your wheels start to lock up, ease off the brakes.
3. Keep your lights and windshield clean.
4. Don’t use cruise control or overdrive on icy roads.
5. Be especially careful on bridges, overpasses and infrequently traveled roads, which will freeze first.
6. Don’t assume your vehicle can handle all conditions. Your vehicle will react differently on snow and ice than it usually does.
