Early Childhood Education, M.Ed.

The Early Childhood Education program is designed to provide an advanced program of study focusing on the developmentally appropriate care and education of children from birth through age eight within various early childhood and elementary school settings both within and outside of public schools. The student will be given the opportunity to demonstrate a basic knowledge of educational research including: research procedures and methods; sources and formats utilized for presenting education research; critical review of research reports; and the preparation and defense of a research proposal. The Early Childhood Education program emphasizes the whole child and exposes the student to the scientific knowledge bases regarding: 1) development of children, 2) learning theory, and 3) appropriate educational practices as well as the opportunity to develop competence in working with parents of young children.

The scientific and theoretical foundation for the program is the study of the Constructivist Theory as it relates to cognitive and affective development and the implications for the care and education of young children. The curriculum is designed to provide an individualized program of study based on the student’s experience and professional goals.

Other areas addressed include: assessment issues and techniques, sociocultural aspects related to diverse backgrounds, principles of play in child development, and principles of guidance, professionalism and advocacy.

Note: A master’s degree in Early Childhood Education does not fulfill the requirements for initial certification/licensure by the Oklahoma State Department of Education. Additional coursework will be included in the master’s degree plan of study for those who desire to obtain certification through UCO’s teacher preparation program or those who do not have a background in Early Childhood Education.
