THE CENTRAL SIX
At the University of Central Oklahoma, we are guided by the mission of helping students learn by providing transformative experiences so that they may become productive, creative, ethical and engaged citizens and leaders contributing to the intellectual, cultural, economic and social advancement of the communities they serve. Transformative learning is a holistic process that places students at the center of their own active and reflective learning experiences. A student’s major field is central to the learning experience and is a vital part of the “Central Six”: Discipline knowledge; Leadership; Problem Solving (research, scholarly and creative activities); Service Learning and Civic Engagement; Global and Cultural Competencies and Health and Wellness.

COURSE DESCRIPTION:
According to the UCO 2013 catalog, this course is described as follows: This course will examine substance abuse and the family as a natural social system and the influence that alcohol and other drugs of abuse have on this system. Major emphasis is placed on theoretical models of
roles that typically exist in families dealing with substance abuse and dependence, including common patterns of the progression of the disease and the consequences on the family system.

COURSE OBJECTIVES:

When you have successfully completed the course, you will have accomplished the following:
1. Understand the conceptual frame.
2. Understand the shared disease.
